

Gazing back through the pages of history, Christians have clearly seen God's hand intervening in the lives of individuals. One event that clearly altered all of human history, however, was the Tower of Babel. God mercifully interceded to hinder mankind's single-minded rebellion:

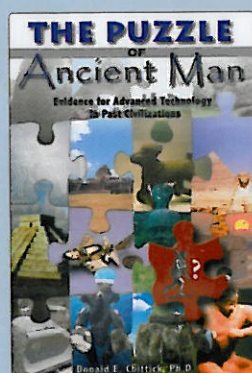

Come, let us go down and there confuse their language, that they may not understand one another's speech. So the Lord scattered them abroad from there over the face of all the earth ... (Genesis 11:7-8).

God's division of the people ultimately led to the distinct cultures, physical characteristics, languages, and religions we see today.

Other global patterns, such as the location of stone tools and ape and human fossils, also make sense in light of biblical history. The Bible leads us to a completely different interpretation of history than that of secular evolution.

The Tower of Babel, revealed in God's unerring Word, is clearly the proper starting point for understanding human history and the many differences in our world.
